SENATE CHAMBER, RALEIGH, N. C., March 13, '79.

COL. WALTER CLARK, DEAR SIR :- I desire to call your attention to the clear intimation of your card of yesterdey that I, as President pro tem of the Senate, had appointed the committee of investigation referred to with a view of having injustice done to you. This charge greatly surprised me and does me very grave injustice. I appointed honorable and upright gentlemen, upon the spur of the moment, without previous consultation and without thinking for a moment of their former position on any question; and certainly with no such design as you impute to me. Respectfully, yours &c.

J. I. SCALES.

RALEIGH, N. C., March 13:h, 1879. COL J. I. SCALES, DEAR SIR:-I am glad to receive your assurance that your appointment of the committee referred to was made without any intention of having injustice done me. Upon your statement, and I am satisfied that you would make no statement that is not entirely true, I cheerfully acquit you of inten-

ional wrong in the premises, Respectfully, yours &c., WALTER CLARK.

Important Legal Opinion, A question between Resident and Riding Judges decided by Attorney General Kenan.

GREENSBORO, March 4th 1879.

COL. THOS. S. KENAN, Attorney General of N. C.
DEAR SIR:—At the request of his
Honor, Judge Kerr, I address you this note, asking you to construe for us, the provision of the coustitution relating to the supplying of vacancies in the office of Cierk of the Superior Court.

Who is to appoint the successor, the Judge residing in this District, or the Judge riding this District? I have reason to believe that your adjudication of this question will re-

neve the Judges of the emburrassment of a conflic of views, and furnish a rule for future guidance. With my great respects,

Your friend and servant, RALPH P. BUXTON. ATT RNEY GENERAL'S OFFICE

RALE GH, March 6th 1879. JUDGE BUXTON,
DEAR SIR:—Your letter written at the request of Judge Kerr, and asking me to construe the provision in the constitution relating to filling vacancies in the office of Saperior Court Clerk, has been received. The question you submit, is,-"whether the Judge residing in the district, or the Judge riding the district has the power to

supply the vacancy?"
The constitution of 1868 provided that in case the office of Clerk became vacant otherwise than by expiration of the term, and in case of a failure by the people to elect, the Judge of the Superior Court for the county shall appoint to fill the vacancy until an election can be regularly had, art, iv, sec. 35. The judges were then as now elected for, and required to remitted, with the consent of the Gov-ernor, to exchange districts with each other. True, it was decided that in the event of an exchange, the substi-tuted judge became the judge of the district for certain purposes, but re-tained other powers belonging to him

fact, that in case of a failure of a clerk to give bond and qualify according to law, the legislature requires the chair-man of the commissioners of the county to immediately laform the judge of the district thereof, who thereupon declares the vacancy and fills the same.

Bat. Rev. ch. 17, sec. 140. The statute
manifestly directs the notice to be sent
to such judge because as it must be assumed, the law makers b lieved that
the constitution lodged the power o appointment in him, to fill vacancies under the section above cited.

Now has the resident judge the same power under the amended constitution, which contains a similar provision, and in the same words? Art. iv. sec. 29 The act requiring the judges to hold the courts in the different districts successively does not expressly or by reference attempt to revoke a interiere with the power, or it be competent to do so, though their jurisdiction has been defined in the waters of New River. the matter of appointing receivers, To establish the dividing line begranting injunctions, &c. Acts 1876-7, ch. 223. A judge on the circuit and holding the courts of the different districts for the purpose of trying causes, is still the judge of the district for cities to serve process. which he was chosen; and as such, he is the judge of the Superior Court of a tween Cateret and Pamilico and becounty in his district for the purpose tween Carteret and Craven. This bill of ex reising the power of appoint-ment to fil a vacaucy in the office of To authori

clerk of such couct.

Therefore my opinion is that the judge residing in the district, has the power under the present, as I think he did under the constitution of 1868, to fill such vacancy.

Very Respectful'y, &c., Thos. S. KENAN, Auy. Gen'l.

OUR LAW MAKERS.

SENATE. THURSDAY, March 13, 1879. The Senate got to work promptly at 10 o'clock, President Robinson in the

QUESTION OF PER DIEM. Mr. Davidson introduced a resolution to interpret the number of days members of the Assembly were entitled to draw per diem for. The question was whether it was sixty or fifty-seven

Mr. Mebane said it was too late to seek a construction of the law after most of the members had put the per diem in their pockets The custom had ever been to charge for Sundays, but those who had conscientious scruples in the matter could charge only for fitty-seven days. He moved the resolution be tabled, and it was tabled.

WITNESSES IN THE SWEPSON TRIAL. On motion of Mr. Nicholson, the vote was reconsidered by which the resolution in favor of the witnesses in the Swepson prosecution was defeated yesterday. He voted last night under a misapprehension against the resolu-

tion, but now favored its adoption. A message was received from the Governor stating that imprortant witness were required, living in Buncombe county, and counties west of that point, who were unable to pay the necessary expenses to and from Rala eigh, and that if not relieved by the State's paying their expenses the trial would result in nothing.

Mr. Dortch moved to amend the res-

olution by providing that such witnesses shall be required to transfer secure the reimbursements of the sums advanced. Mr. Nicholson said this amendment would fully secure the State in the

event of conviction or otherwise. Mr. Caldwell, with this amendment said he would vote for the resolution. Mr. Austin was now satisfied with the resolution.

Mr. Erwin had voted last night against the resolution, but it was not to be understood that he was then op-

posed to the prosecution of Swepson. He merely meant that he was opposed to making a distinction between Swepson and any other criminal. The resolution was then adopted. THE FISH BILL.

The bill to prevent obstruction to the passage of fish in the several s reams in the State, and to provide for fish ways, was taken up. A large number of amendments

were offered, proposing to exempt certain rivers from its operation. The Senate, however, had determined to fish a free passage to all our head waters, and voted against all these amendments.

Mr. Williamson urged the passage of the bill. Fish was said to be the great sustaining power of the brain and was essential to those oppressed with

Mr. Scales thought "whaling" doses would be required in some quarters. [Mr. S. had certainly purloined a portion of Mr. Williamson's thunder to help lim to this flash, for that Senator turned upon him a withering gaze, which seemed to say that if he, Mr. S "cod" do no better than that with it

he "shad" have left it alone.

Mr. Mebane lived upon the lonely Dan, between which and the sea there were no obstructions; yet from some cause or other the fish never visited him. He moved to amend by pro-viding that the fish be requested and required to visit those sparkling waters. As for the stream Mr. Williamson lived on, there was no use in making a fuse about the matter, as it was too small

to contain fish.

Mr. Williamson thought this the most unkindest cut of all, in view of the fact that his stream had been feeding Mr. Mebane's Dan from the earliest days of its existence. Some Senator spoke of the efforts of the Governors of South Carolina and ly as was possible. North Carolina to settle the fish ques-

tion on the southern borders of our

State.

Mr. Redwine demanded to know what was said by the Governor of South Carolina to the Governor of North Carolina. Several Senators appeared to think it was, and stepped out of the chamber to see a friend.

And then the bill passed, pretty much as it came from the House.

SOLICITORS AND GRAND JURIES. The bill to make it lawful for solicitors to appear before grand juries when requested to do so by the juries, was taken up. The purpose of the bill was to legal 222 a custom which had long to leg prevailed up to the time of a recent should take up the matters which were tered certificates of the literary fund, decision of the Sopreme Court, and in the committee's hands but is to laga ze a custom which had long committee having resigned, the House the twelfth, 1861; and the said

civil procedure, being sec. 31, chap. 17, of Battle's Revisal, was put upon its passage.

The objection of the bill was to put the principal and sureties on a footing as to the time of the liability.

The bill failed to pass.

Mr. Caldwell moved to reconsider the vote by which the supplementa' bill to the act concerning the Cape Fear and Yadkin Valley Railroad. Ruled out of order; a similar motion baving been laid on the table last night. CALENDAR.

This bill provides that in such cases the friends of such inebriates may apply for such

FRIDAY, MARCH 14, 1879. HUSSEY & JORDAN, Prop's JOHN B. HUSSEY, - Editor.

The Legislature.

To-day at 12 o'clock the Legislature adjourns without day. The constitution limits its session to sixty days. The limitation was reached on the 8th. and since that time the session has been at the will of the members and at their expense. A Legislature sitting without compensation, at their own volition, is a spectacle never before witnessed in the history of North Carlina. Moved solely by considerations for the public weal, both parties have unselfishly and patriotically protracted the session at their own expense and inconvenience. This is, judeed and truth, a proud record for North Carolina. The same lefty considerations have inspired the most of the legislation enacted at this session. Mistakes there have been, of course. A large majority of the members were inexperierced in legislation. Many of them were in public life for the first time, and consequently without that quick apprehension of public affairs essential to the dispatch of public business and the intelligent discharge of public dus ties. They have done weil. They have done their duty honestly and conscientiously, as they understood that duty.

It will be a memorable Legislature. The patriotic adjustment of the gravely complicated senatorial question in the election of Gov. Vance to the United States Senate makes it memorable.

The honorable adjustment of the State debt, which has been a most grievous incubus upon the prosperity of the State, makes it memorable.

The successful inaugurat on of the PEOPLE'S REFORM MOVEMENT, which looms up as the great issue in 1880, makes it memorable.

Its patriotic efforts in developing the hitherto unaided internal improvement schemes in the State makes it memor-

The general weal has been subserved, and the verdict of the people will bet is hard to tell what it will be.

THE INDICATIONS are that the extra session will be very short no matter what course Mr. Hayes may choose to adopt in regard to signing the appropriation bills. The popular plan among the Democrats of the House, as expressed by those now in Washington. according to the Post, is to confine business to the two appropriation bills. The legislative, executive and judicial bid will be reported and disposed of promptly, just as it passed the last House. Not an additional i will be doxted or a t cross d. It will go to the Senate and be passed there with as little delay as possible. Meantime the House will do nothing. Not even the army appropriation bill will be touched until it is seen what Hayes proposes to do. If he sees fit to approve the legislative bill, then the army bill will be passed as quickly as possible and Congress will immediately adjourn. Should Hayes veto the legislative bill, then the Democrats of Congress will conclude that no time need be wasted fooling with him, and they will adjourn at once. If Hayes sees fit to call another extra session, it will convene and enact the same programme over again and even again if necessary, The Democrats will not yield an inch, and are willing for Hayes to try the experiment of running the Government without money if he wants to.

SENATOR BAYARD was in New York yesterday and expressed about the same views to the Herald-according to the News special from New York.

Woman has taken another step in the advance. Struggling for release from the chains which hundreds of ages of tyranny has imposed, she has entered into a new sphere of usefulness; one hitherto occupied, monopolized, and erjoyed solely by men. The advent of the female pugilist is announced. Her first appearance, as it should be, is in the future great city of the Pacific, called by its inhabitants "Frisco." Talk of your female preachers, your female doctors, your female lawyers, your female walkers of a million quarter miles in a million quarter hours! In Frisco there are a pair of females in training under experience d professional gentlemen, punching sand-bags, swinging Indian clubs, striking out with dumb-bells, running up hills, eating raw beef, and practicing with the gloves, to the end to bring in the crowning act of woman's emancipation. When woman has demonstrated her superiority to man as a bruiser-as she has in every other hitherto masculine department that she has undertakenthe day of ma culine dominion will be over. Being the more polemical in disposition, it will not require centuries for her to reduce her late master to that state of subordination from which she has so sublimely emerged. There will be no more said about the weaker sex, the softer sex, or the gentler sex, unless, with the other female parapharnalia, these shall be delivered over to the diminished males as symbols o their deposition.

John M. Moring, Esq. was, at the night session Wednesday, presented with a gold watch by the members of the House irrespective of party. The presentation speech, made by Mr. Cobb. of Lincoln, was felicitous Mr. Mor ng responded in graceful and medest words. He has presided over the House with ability, firmness and impartiality and the recognition of his services in the chair by the House is not an empty honor.

verywhere is commending him. As a citizen, the negro is a fixture, and no houghtful southern man would have t otherwise. His status as a citizen depends upon the contingencies that naturally grow out of his new condition. These contingencies he must face as the white man has faced them. It other words, the status of the negro as a citizen must be fixed by himself. His future is in his own hands, to make or to mar. Meanwhile, the people of the South perceive that it is to their individual interests and to the interests of their section to aid of the colored man by every means in their power to a just and wholesome appreciation of their new relations to the State. This can only be done by extending to them such facilities of education as are at command, leaving them to work out the rest of the problem for them-

A REVIEW of Commissioner Polk's 'Hand-book of North Carolina" has been carefully prepared for the News and appears in this morning's paper. Even a hasty glance at its varied contents discloses its value to North Carolinians as a book of reference. It conains a mass of valuable information concerning the State never before pubished and as our reviewer says, is the best "home educator" ever offered our people. The dense ignorance of North Carolinians concerning North Carolina s a reproach to our name and history. Possessed of an unusual degree of State pride the extraordinary labor involved in the proparation of the book has been a labor of love with Commissioner Polk. We earnestly commend the in North Carolina.

The politicians continue to shout Tilden and Grant. This sort of booming will do until the people take hand. They will not tie the fortunes of the country behind either political back. It is the "dark horse" that wins. some man whose record does not condemn him, is sure to be the people's choice in 1880.

COMMISSIONER POLK'S pedigrees are not known to us. Whether there is any "blue blood" in his veins we know not. But his spinal column is in the right place. It was the rugged backbone of the industrious Commissioner that saved the farmers department of the State Government from the ironjawed retrepcher.

An attorney in a court in Kentucky declares that he can prove that detectives of the United States secret service bureau have made and passed spurious coin. We do not know anything about the evidence in this case, but the most abundant proof of the allegation would not astonish any person acq with the record of this force.

FORTY-EIGHT failures were reported in New York during the last month, the total liabilities being \$912,669, and assets \$393,066. This is a reduction of five in number and \$500,000 in amount of habilities compared with the preceding month. For the corresponding month of the year 1878 there were sixty-seven failures, and total liabilities \$4 300,000.

ALL THE NEWS from Washington puts Blackburn ahead in the race for Speakership of the House. But little weight, however, is to be attached to Washington news.

NOTHING but water is lacking to the grandeur of some of the streams remembered in the river and harbor bill.

Brilliant Marriage.

The following special cablegram was received at the NEWS office yesterday. No doubt our readers will share the deep interest we feel in the intelligence sent by our London correspondent:

LONDON, March 13th. The weather for the past ten days has been bright and fine, affording ample facilities for the preparation at Windsor for the celebration to day in St. George's Chapel of the nuptials of the Duke of Connaught, son of Queen Victoria, and Princess Louisa Margaret, daughter of Prince and Princess Freds erick Charles, of Prussia. To-day the sky is cloudless and the weather beautiful. Marriage presents are displayed in the white drawing room of the Castle, and are being added to up to the last moment.

Hand-Book of North Carolina

This is the title of a book just issued by the Agricultural Department of the state. Upon examination of it, we are stonished at the almost exhaustless variety of matter bis orical, statistical and otherwise treated of, and the amount of so much valuable information to the people of the State, it contains. People unacquainted with such work can searcely conceive how so much can be done in so short a time. Within the last ninety days the compilation of this book commenced. The small clerical force at the Commissioner's command, the extensive correspondence, the great pains and labor for its accomplishment, must have severely taxed the energetic head of the Department. It is a credit alike to the State and the Department. It is designed chiefly to supply a long felt want in our Statecompendium of our industries, our people, our physical resources and our great natural wealth, our minerals and metals, our mountains, rivers, and our varied climate and productions, in act, North Carolina as she has been now is, and with the blessings of liber ty, and good government, will be n the future. These are some of the objects of the book. Its contents are divided into three parts. Part first gives a history of the laws and the book to every man, woman and child laws creating the Department and its organization and the names of the officers, the manner of conducting the business of the Department and its work And the Commissioner says, "Although the Department is yet in its infancy and the system as established by the Act is more comprehensive in its general design, than that of similar partments in other States; and while it has had to contend with those difficulties which seem unavoidable in the inauguration of any enterprise of magnitude, yet its work has been received with interest and almost universa favor among the people of the sketch of the State from 1584 to 1879. embracing a list of S ate officers from 1663 to 1879, and the delegates in each Convention from 1776 to 1875, and a list of R presentatives in Congress from 1774 to 1879. Much of the bistory of the State in a condensed form, is given, making it a valuable took of historical reference and at once interesting and instructive. Scarcely any important event being overlooked; it seems to have been the design of the work to embrace everything. In speaking of the position taken by North Carolina in the late great war between the States. the author says: 'Thus North Carolina took position with her Southern sisters and at once began to prepare vigorously for the conflict which was now inevitable. should be preserved. Part II is a physiographical description of the State, by W. C. Kerr, State Geologist, showing its situation, extent, physical geography, geology, minerals and climate. This description of the State and its many sources of material wealth does credit both to the head and heart of Prof. Kerr and indeed an is invaluable feature of the work. It would be incomplete without it. He says "minerals are found in Alabama, great variety and abundance over a Arkausas, large part of the State. Among the mes useful and important are the following: Mark non, coal, peat, lime-stone, gold, copper silver, lead, zinc, mica, graphite and corundum, besides Illinois, maganese. kolin, fired y, tale, pyrophyllite, whetstone, grindstone and milistone grits, a great variety of building stone, serpentine, marble, chromic iron, barytes, oil shales, buhrstone, roofing slates, and several precious stones, such as diamond, agate, garnet, sapphire, ruby, beryl and amethyst. Marl, he says is found only in the eastern regious, but is very abundant in 25 counties, occurring in entensive beds, which contain all the elements of a complete and permanent fertilizer, an o casional dressing, (once in 15 or 20 years) being sufficient to render a poor soil permanently productive." This is the most va nable mineral in the State, as it is easily accessible to more than half of its farming lands, and is applicable to all crops. He says "the State contains a vast quantity of iron ore of every variety, distributed over a very Coal is found mostly in Chatham

"Sam" and "Joe."

Special to the News. WASHINGTON, March 13th. The rews circles of the city are filled with nothing but the present contest for the Speakership of the House, between the two Democratic champions Randall and Blackburn. Every hotel lobby is filled with admirers of the candidates. The names of Sam and Joe Then follows an historical are heard even among the bootblacks around the doors of the hotels and along the streets. Blackburn's friends are lively and hopeful over the situation and anticipate a much merrier time next Tuesday, the 18th, when Joe Blackburn is announced Speaker. Most of the leading Western and Southern iournals have come out boldly and taken strong grounds in favor of Blackburn, which has given the movement here new life and is rapidly shaping the course of the struggle. Northern Democrats, like Morrison and Springer, of Illinois, Burch, of Wisconsin, Ewing and McMahon, of Obio, Cox, of New York, and a host of smaller lights are loudly proclaiming that it is time for the South to come to the front and demand her just dues.

Gen. McArdle, one of the most prominent and experienced journalists of the South, has written an open letter to volved, she displayed a self-sacrificing Hon. V. H. Manning, of Miss., on the devotion of which any people in any age situation taken by Mr. Randall and his might justly be proud; she gave to the friends on the tariff, and the impractaouthern army more than 120,000 of cability of electing a Southern man her sons, exceeding a ratio of one man | Speaker. McArdle has completely deto every six of her ent re white popula- molished the position taken by Raudall and his admirers on these points. Raudali's recent visit to New York has not done him any good in his present fight. He returns fully endorsed

by Tilden and his cohorts. The extra session is creating much talk as to how long it will last. It seems to be thore oughly conceded that much legislation of an important character will be brought -forward; as there are many new members each one will want to push his own scheme with a view of sumption by their constituency.

LIVER PILLS

FOR THE CURE OF Hepatitis, or Liver Complaint,

DYST SPSIA AND SICK HEADACHB Symptoms of a Diseased Liver.

)AIN in the right side, under the l edge of the ribs, increases on presside; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternative with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight, dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled, his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease, but cases have occurred where few of them existed, yet exam-ination of the body, after death, has

DR. C. McLane's LIVER PILLS, an CASES OF AGUE AND FEVER, when taken with Quinine, are productive of the most happy results. No better cathartic can be used, preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a FAIR TRIAL. For all bilious derangements, and as a simple purgative, they are unequaled.

LIVER

This important organ weighs but about three bounds, and all the blood in a fiving person about three gallons) passes through it at least once every half hour, to have the bile and ther impurities strained or filtered from it. ile is the natural purgative of the bowels, and other impurities strained or filtered from it.

Bile is the natural purgative of the bowels, and if the Liver becomes torpid it is not separated from the blood, but carried through the weins to all parts of the system, and in trying to escape through the pores of the skin, causes it to turn yellow or a dirty brown color. The stom ach becomes diseased, and Dyspepsia, Indigestion, Constipation, Headache, Biliousness, Jaundice, Chills, Malarial Fevers, Piles, Sick and Sour Stomach, and general debility follow.

Merrell's Hera tine, the great vegetable discovery for torpidity, causes the liver to throw off from one to wo ounces of bile est time the blood passes through it, as long as there is an excess of bile; and the effect of even a few doses upon yellow complexion or a brown dirty looking skin, will astonish all who try it—they being the first symptoms to disappear. The cure of all bilious diseases and Liver complaint is made certain by taking Herattine in accordance with directions. Headache is generally cured in twenty minutes, and no disease that arises from the Liver can exist if a fair trial is given.

EXTRA SESSION.

What Bayard says about it. Special to the Baleigh News. NEW YORK, March 13.—The Herald gives the result of the interview with Senator Bayard in this city yesterday. He is reported as expressing his opius ion that the Extra Session should be so short as to exclude the general legislation-Only two appropriation bills, and the passage of laws demanded by the House at the last session engaging the attention of Congress. He defined these laws to be repeat of the war test oath of 1862-Enactmet of law providing for impartial jurors-Amendment of the present law which present the appearance of armed forces at elections to keep peace and repeal those sections of revised statutes which provide for the appointment of federal officials as supervisors of elections in several states and countless deputy marshals.

Our country is getting to be fearfully alarming, the average of life being lessened every year, without any reasonable cause, death resulting generally from the most insignificant origin. At this season of the year especially, a warranted. cold is such a common thing that in the hurry of every day life we are apt to overlook the dangers attending it and often find too late that a fever or lung trouble has already set in. Thousands lose their lives in this way every er, while had Boschee's German Syrup been taken, a cure would have resulted, and a large bill from a doctor been avoided. For all diseases of the throat and lungs, Beschee's German Syrup has proven itself to be the greatest discovery of its kind in medicine. Every Druggist in this country will tell you of its wonderful effect. Over R. B. Andrews & Co, Clothiers & 950,000 bottles sold last year without a single failure known.

Dread and despair fa'l upon the community when a territide epidemic, like the cholera or yellow fever, sudden'y desolates our homes: yet, all the while a more insidious, but no less fatal foe, eners abousands of households every year all de rries off the flower of the family in the early flush of manly youth and budding womanhoed People call it presumption, radecine." I is not, in most cases, the tubel cular phthirler consumption of the lungs, which is the peculiar maindy in climates like those of the British is lands and New England, but a seneral decay or alrest of the vital processes on nutrition. All the doctors agree that there is no remedy for this but COD LIVER (IL but they are constantly met by the obstacle of inability on the part of the patient to swallow or retain it. This repuision is entirely overcome by SCOTT'S EMULSION OF THE AND SODA which is acresable to the taste and an une ed nother tind tonic for the body nerver. A dwelling house in the city of

A Remedy that has been Remedied.

The invincible repugnance felt by almost every one to the smell and flavor of cod Liver Oil, has prevented tens of thousands of the victims of debility, from reaping the benefits of its peculiar healing and nutritive properties. The almost hopeless consumptive, the martyr to kheumatism, the barely living shadew of men, women and chit tren that emerge from the clutches of malarial fevers, all of these know, or at least their dectors know, that of all discovered remedies, this Oil is the best, and often the only one that will build up their wasted bodies, and and restore their shattered nerves, and far more effective than the Oil by itself is Scott's Emuis on of it, with the H-pophesthites of Lime and Soda. This is the nnest and most natural food and medicine in the world, and wholly deprived of its disagreeable qualities. Sold by Wm, Simpson, Druggist.
